### DETAILED ACTION

1. Newly submitted claims 19-30 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claims 19-30 is directed to counting numbers of letters in a document image, calculating an embedding capacity based on the determined number of letters, and determine whether or not the entire digital-watermark information is capable of being embedded in the document image based on the embedding capacity in order to embed the digital watermark which is directed to an invention distinct from and independent of the invention previously claimed.
2. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 19-30 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.
3. The amendment filed on 03/14/2007 canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention because it would be a serious burden on the examiner if restriction is not required because the newly invention require a different field of search then the previously presented claims 1-18 The combination as claimed does not require the particulars of the subcombination as claimed for patentability, and that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the

Art Unit: 2624

subcombination has separate utility such as counting a number of letters in the document image and calculates an embedding capacity based on the number of letters in order to increase robustness.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
